Alchimie Forever Helium Beautifying Body Conditioner

Bathing moisturizes skin temporarily, but then you end up removing the oils that protect your skin. What better way to make sure you keep moisturized than to apply something while in the bath. This body conditioner is applied while you're in the bath or shower and is full of antioxidants from rosemary and green tea. After you rinse and dry off, your skin is left rejuvenated.

Alchimie Forever Yttrium

Full of antioxidants, this rich cream is light enough to wear under makeup, but heavy enough to give you the protection you need during the winter months. And it's quickly absorbed, so your face isn't left feeling greasy.
