Just In Time for a Cold, Dry Winter

The Alchimie Forever rejuvenating skin care line introduces its richest moisturizer for the cold, dry, winter season: Kantic + luxuriously nourishing cream.

Kantic + luxuriously nourishing cream was conceived specifically to heal and soothe extra dry skin during the cold winter months. This ultra-rich moisturizer is packed with emollients, including jojoba seed oil and vitamin E, nourishing the skin and infusing it with moisture, for a more supple and radiant look. Like all Alchimie Forever products, Kantic+ is infused with powerful antioxidants derived from blueberries and grape seeds to help fight free radicals and minimize facial redness, while red clover extracts stimulate the skin's natural collagen production, alleviating the appearance of signs of skin aging.

Use Kantic+ daily, in addition to the company's flagship day and night moisturizers, Yttrium and Kantic. Kantic+ is also ideal during long flights, preventing moisture loss and restoring elasticity to your skin.

Available at www.alchimie-forever.com, www.skinstore.com, and in luxury day and medical spas including The Mezzanine Spa (NYC), Ajune (NYC), Nusta Spa (DC), and more.
