●●● The best quick fixes to improve your complexion

Q What's the best mask to apply to get a quick glow before a party?

A For brightening skin, look for a combination of exfoliating ingredients such as glycolic and salicylic acid, and hydrators such as hyaluronic acid and glycerin, says Bank. A good one to try: Clinique Turn-around 15-minute facial. If your skin is red and irritated, try the Alchimie Forever Kantic moisture mask. Soothing oats and grape extracts relieve redness, while mica gives you a nice glow, says Lewis. And remember: Do a trial run long before any big event.
