What We're Loving Now

BEAUTIFUL SCIENCE

Leave it to two Swiss doctors (husband and wife team Luigi and Barbara Polla) to create a brand of cosmetics that combines years of scientific research with the perennial goodness of nature. The Pollas' creation, **Alchimie Forever**, is a skin-care line that uses antioxidant botanicals like blueberries, tomatoes and turmeric to create healthy, younger-looking skin. Try the **Helium Beautifying Body Conditioner**, a post-shower cream that locks in moisture, or apply **Kantic Lights Off** night cream before bed to wake up with plump, even-toned skin. *AlchimieForever.com.* —Tracey Giordano
