

Foot Relief from Alchimie Forever

The Alchimie Forever rejuvenating skin care line is being expanded with the addition of a new product: 532nm antioxidant relief for the feet.

The new balm contains ingredients designed to not only nourish and soften the feet, but also exfoliate, help alleviate pain and detoxify.

Included are shea butter, used for its soothing, hydrating, softening and protective properties; jojoba, also used for hydrating and softening as well as for the various antioxidant molecules it contains; and watercress, for detoxifying and toning.

A further ingredient is willow bark, ideal for the exfoliation of calluses and roughness and used for centuries as an antiseptic and anti-inflammatory remedy. It is also known as a natural pain reliever.

532nm 5fl oz is available from various spas and medical spas, as well as on-line at www.alchimie-forever.com
