Post-laser relief from the experts

Posted Wednesday, May 30, 2007

Got any laser treatments planned for your body? Although the results are worth it, you can expect some irritation. Take our advice, and be prepared: have **Alchimie Forever's Afterlase** soothing milk on hand.

Created by the medical-minded beauty experts of the **Forever Laser Institut** in Switzerland, Afterlase was born of necessity. It contains rosemary and green tea to repair the most irritated skin, and menthol to instantly cool.

Beyond laser treatments, Afterlase can do away with discomfort from just about any irritation, from shaving to sunburn. Regardless of why your skin is upset, it can become supple and soothed.
