Bright eyes

"Under-eye shadows are a problem of skin quality and thickness, fragile blood vessels and sagging muscle," says Dr Barbara Polla, creator of the Alchimie Forever line and co-founder of the Forever Laser institute in Geneva (www.forever-beauty.com), a futuristic establishment in what resembles a contemporary art gallery. Dr Polla recommends a variety of techniques for refreshing the eye-contour area, from a skin-lightening peel to filler injections, laser rejuvenation and mesotherapy (micro-injections of antioxidants and amino acids).

In a more compact form, for everyday use: 7. Diopti anti-puffiness gel, €23, Liérac. 8. Eye Tuck anti-bag cream, €49 [Galeries Lafayette], Skin Doctors. 9. To camouflage dark circles, Stick M Cover, fragrance-free, €15 [out in April] Clinique for Men.

10. Superpulse rejuvenating eye balm, €59 [Printemps], Alchimie Forever.
