Alchimie Forever : Tightening Eye Contour Gel

Summer nights are long nights and some nights are all-nights - and still you have to get to the office in the morning, even if your eyes look like you took a shiner from a stop sign. We know someone who stores Alchimie Forever's Tightening Eye Contour Gel in the desk - for just that sort of occasion.

As you probably remember from secondary school (or Harry Potter), alchemy is the process of changing base metals into gold - or, metaphorically, transforming that morning-after face into something radiant and glowing.

Thanks to apple extract, Alchimie Forever's oil-free, tightening eye contour gel penetrates instantly to reduce puffiness and other signs of your nocturnal debauchery. There's also the powerful astringent, alchemilla, which minimizes undereye bags, while the addition of jojoba increases your skin's elasticity and firmness.

Founded in Switzerland, Alchimie Forever (named for the French/Persian word "kimie," meaning "alchemy") is a family business comprised of a well-known dermatologist who introduced laser technology to Europe and his biochemist wife, a specialist in anti-aging and antioxidant technology,

and their four daughters.

Alchimie Forever's Tightening Eye Contour Gel also contains antioxidants derived from maté, as well as the vitamin K from basil, and the combination immediately minimizes the look of fatigue - as well as those dark circles left over from your run-in with the stop sign.

Tuck this one into your pocket like a lip-gloss - and look radiant all summer, in spite of your hedonistic behavior.
