HOLIDAYS**

## DIY eye depuffer

From Rosario Gonzalez of the Alchimie Forever Spa, in Washington, D.C., to help brighten and tighten the skin's appearance around your eyes temporarily: You'll need 2 bags of green tea, steeped and slit open at the top; grated cucumber; and 1 snack-size bag filled with frozen peas. (1) Stuff ½ teaspoon of cucumber into each tea bag, then place a bag over each eye. (2) Lay the bag of frozen peas across both eyes. (3) Remove after 10 minutes. The brew is high in antioxidants; the chilled peas reduce puffiness.
